## Academic Biography

- Since October 2023: Managing Director of the Department of Media Studies, Paderborn University
- Since April 2022: Chair Professor of Media Systems and Media Organisation (Mediensysteme und Medienorganisation) at Paderborn University's (Universität Paderborn) Department of Media Studies (Institut für Medienwissenschaften)
- 2015-2022: Director of the Communication and Media Research Institute, University of Westminster <http://www.camri.ac.uk>
- November 2017-July 2018: Faculty Co-Director of Research of the Westminster School for Media, Arts & Design, University of Westminster
- 2015-2018: Director of the Westminster Institute for Advanced Studies, University of Westminster (<http://www.wias.ac.uk>)
- 2020-2022: Professor of Media, Communication & Society, University of Westminster, Communication and Media Research Institute
- 2013-2020: Professor of Social Media, University of Westminster, Communication and Media Research Institute
- February 2013 – July 2015: Co-Course Leader of the MA in Social Media, Culture and Society
- October 2010-January 2013: Professor of Media and Communication Studies, Department of Informatics and Media (Institutionen för informatik och media), Uppsala University, Sweden
- April 2008-September 2010: Associate Professor (Privatdozent), University of Salzburg, Faculty of Cultural and Social Sciences
- October 2005-April 2008: Assistant Professor for Internet and Society at the ICT&S Center for Advanced Studies and Research in Information and Communication Technologies & Society (ICT&S Center, University of Salzburg)
- 2004-2005: Lecturer at the ICT&S - Center for Advanced Studies and Research in Information and Communication Technologies & Society, University of Salzburg
- July 2001-June 2004 Research assistant at the Institute of Design and Technology Assessment, Vienna University of Technology
- 2000-2006: Lecturer at the Vienna University of Technology's Institute of Design and Technology Assessment

## Education and Academic Degrees

- Academic degrees: Prof., Privatdozent (PD), Dipl.-Ing., Dr.techn.
- 1994-2000 Studies in computer science at the Vienna University of Technology. Major fields of study: sociological and philosophical aspects of informatics and

computer science, information society, technology assessment, Human Computer Interaction, User Interface Design

- 1999-2000 Diploma thesis (“Selbstorganisation in der Informationsgesellschaft“. “Self-organization in the Information Society”)
- March 2000 Final degree (Dipl.-Ing.)
- Autumn 2000 – March 2002 Doctoral studies in technical sciences at the Vienna University of Technology, dissertation/thesis: “Aspekte der evolutionären Systemtheorie in ökonomischen Krisentheorien unter besonderer Berücksichtigung techniksoziologischer Aspekte“ (“Aspects of Evolutionary System Theory in Economic Crisis Theories with a Special Sociological Consideration of Technological Factors“) within the framework of the international research project “Human Strategies in Complexity. Philosophical Foundations for a Theory of Evolutionary Systems“
- March 2002: Final degree (Doctor technicae)
- February 2008: Habilitation (venia docendi) in the field of Information and Communication Technologies & Society, University of Salzburg, academic degree: Privatdozent [= academic qualification for a full professorship] (reviewers: Prof. Douglas Kellner, University of California Los Angeles, USA; Prof. Leah Lievrouw, University of California Los Angeles, USA; Prof. Nick Dyer-Whiteford, University of Western Ontario, Canada; Prof. Robin Mansell, London School of Economics, UK; Commission: Prof. Wolfgang Hofkirchner, Universität Salzburg; Prof. Manfred Knoche, Universität Salzburg; Prof. Manfred Tscheligi, Universität Salzburg; Prof. Christiane Floyd, Universität Hamburg; Ao. Prof. Martin Weichbold, Universität Salzburg; Ass.Prof. Ursula Maier-Rabler, Universität Salzburg; Lukas Fabi, Universität Salzburg)

### **Main Research Interests**

social theory, critical theory, social and political philosophy, political economy, political economy of media and communication, information and communication technologies (ICTs) & society, information society studies, Internet and society, media & society, media & economy, ICTs & society, social media & society, digital media & society, digital media economics, sociology of technology, technology assessment, working life in the information society, philosophy and ethics of digital media and information technologies

## Taught University Modules

(WT=Winter Term, ST=Summer Term, VO=Lecture)

I initiated and organised the creation and launch of the MA programme Digital Media & Society at Uppsala University (Sweden) and of the MA Social Media, Culture & Society and the MA Data, Culture & Society at the University of Westminster (UK).

Taught modules, Paderborn University:

- Arbeit in der Medien- und Digitalindustrie (Labour in the Media and Digital Industries): WT 2023/2024
- Digitale Arbeit: Arbeit im Zeitalter der Digitalisierung, Sozialer Medien und des Internets (Digital Labour: Labour in the Age of Digitalisation, Social Media, and the Internet): WT 2023/
- Grundlagen der Medienökonomie I (Foundations of Media Economics I): WT 2022/2023, WT 2023/2024
- Grundlagen der Medienökonomie II (Foundations of Media Economics II): ST 2022, ST 2023
- Medienökonomie in Theorien der Informationsgesellschaft (Media Economics in Theories of the Information Society): ST 2022
- Projektmanagement in der Computer- und Videospieleindustrie (Project Management in the Computer and Video Games Industry): ST 2022, WT 2022/2023, ST 2023, WT 2023/2024 (together with Volker Spaarmann)
- Digitale Arbeit: Arbeit im Zeitalter der Digitalen Gesellschaft und des Internets (Digital Labour: Labour in the Age of Digital Society and the Internet): WT 2022/2023
- Medienarbeit: Arbeit in der Medienindustrie (Media Work: Labour in the Media Industry): WT 2022/2023
- Informationsgesellschaft, Netzwerkgesellschaft, digitaler Kapitalismus: In welcher Gesellschaft und in welcher Medienökonomie leben wir?: ST 2023
- Öffentlichkeit und Öffentlich-Rechtliche Medien: ST 2023
- Öffentlich-Rechtliche Medien im Digitalen Zeitalter: ST 2023

Taught modules, University of Westminster:

- Political Economy of Communication, WT 2013/2014, WT 2014/2015, WT 2015/2016, WT 2016/2017, WT 2017/2018, WT 2018/2019, WT 2019/2020, WT 2020/2021, WT 2021/2022
- Critical Theory of Social Media and the Internet, ST 2014, ST 2015
- Approaches to Media & Communication Research ST 2013
- Advanced Independent Study WT 2013/2014 & ST 2014, WT 2014/2015 & ST 2014, WT 2019/2020 & ST 2020, WT 2020/2021 & ST 2021, WT 2021/2022 & ST 2022
- Social Media Research Project, WT/ST 2013/2014, WT/ST 2014/2015, WT/ST 2015/2016

Taught modules, Uppsala University:

- Introduction to Information Society Studies (MA Programme Digital Media & Society) WT 2012/2013
- Internet, Social Media and Society (MA Programme Digital Media & Society) WT 2012/2013

- Critical Media and Information Society Studies (MA Programme Media and Communication Studies) ST 2012
- Changing Media, Media Change (MA Programme Media and Communication Studies) WT 2011/2012
- Analysis of Media and Organizational Communication (MA Programme Media and Communication Studies) WT 2010/2011
- Internet and New Media (MA Programme Human Computer Interaction) WT 2010/2011
- Media Policy and Regulation (Undergraduate Programme International Media and Communication Studies) WT 2010/2011
- Journalism, Media and Society (Graduate Programme in Journalism) WT 2010/2011
- Media, Communication and Society (Undergraduate Programme in Media and Communication Studies) WT 2010/2011, ST 2011
- Current Research in Informatics and Media (Doctoral Course) WT 2010/2011
- Theories and Methods for the Analysis of the Global Media Society (Undergraduate Programme in Media and Communication Studies) ST 2011

Taught modules, University of Salzburg:

- VO Die Selbstorganisation der Informationsgesellschaft (Self-Organization of the Information Society) (WT 2004/2005, ST 2007)
- Seminar Internettheorien (Internet and Social Theory) (WT 2005/2006, WT 2006/2007, WT 2007/2008, WT 2008/2009)
- Seminar Kritische Theorie: Informationsgesellschaft und digitale Medien (Critical Theory: Information society and digital media) (ST 2009)
- Seminar Kritische Theorie und Informationsgesellschaft (Critical Theory and Information Society) (WT 2009/2010)
- Seminar Kritische Theorie: Gesellschaft, Medien, Information (Critical Theory: Society, Media, Information) (ST 2010)
- Magisterkonversatorium (Colloquium for Master's Students) (WT 2006/2007, ST 2007, WT 2007/2008, ST 2008, WT 2008/2009, ST 2009, WT 2009/2010, ST 2010)
- Pro-Seminar Methoden der Kommunikationswissenschaft II (Empirical Social Research for Communication Studies) (WT 2005/2006, WT 2006/2007, ST 2008, ST 2009)
- Seminar Politik im Internet – Soziale Bewegungen und Cyberprotest (Internet and Politics: Social Movements and Cyberprotest) (ST 2005, ST 2006, ST 2007)
- VO (Lecture) Politik und Ökonomie im globalen Informationskapitalismus (Politics and Economy in Global Informational Capitalism, WT 2008/2009)
- Seminar Protestbewegungen und Alternativmedien (Protest Movements and Alternative Media) (ST 2008)
- VO (Lecture) Wissensgesellschaft (Knowledge Society) (ST 2006, WT 2007/2008)

Taught modules, Vienna University of Technology:

- VO Technikentwicklung- und Technikpolitik (Technology-Development and – Politics) (WT 2000/2001, WT 2001/2002, WT 2002/2003)
- VO Informatik und Gesellschaft 1 (Informatics and Society 1) (ST 2002, ST 2003)
- VO Technologie und Medienpolitik (Technology and Media Politics) (WT 2003/2004, WT 2004/2005, WT 2005/2006)

Module, Technical University of Cottbus, Germany:

- Theorien und Aspekte der Informationsgesellschaft (Theories and Aspects of the Information Society) (ST 2003)

Tutor, Vienna University of Technology:

- Mensch-Maschine-Kommunikation (Human Computer Interaction) (WT 1997/98, WT 1998/99)
- Folgenabschätzung von Informationstechnologien (Information Technology Assessment) (ST 1998, ST 1999, ST 2000, ST 2001)
- Gesellschaftswissenschaftliche Grundlagen der Informatik (Sociological Foundations of Informatics) (WT 1999/2000, WT 2000/2001, WT 2001/2002)
- Soziologie für Wirtschaftsinformatik (Sociology for Business Informatics) (ST 2000, ST 2001)

## Research Projects

### **Techne-2: Doctoral Training Partnership**

Duration: Autumn 2018-Autumn 2023

<http://www.techne.ac.uk>

Funded by the Arts and Humanities Research Council (<http://www.ahrc.ac.uk>)

Techne-2 is a doctoral training partnership that consists of a consortium of nine universities. Over a period of five years, it provides funding (fee waiver and scholarship) and training to a cohort of 58 new doctoral students per year. The total numbers of PhD students funded by Techne-2 is therefore 290. Techne's research focus is on the arts, communication, humanities, and culture.

Christian Fuchs is the University of Westminster's representative on Techne-2's management committee.

### **Digitale Demokratie und öffentlich-rechtliche Medien (Digital Democracy and Public Service Media)**

Duration: December 2017-February 2018

Funding sum: €3,000

Funded by Österreichischer Rundfunk (ORF) [*Austrian Broadcasting Corporation*]

*Project description:*

This work is a sub-study of the ORF's Public Value Study 2017/2018 on Public Service Media and Democracy. It investigates the democratic roles that Public Service Media can and should play in society and what prerequisites, requirements and demands exist to that end. Additionally, it analyses legal aspects and the necessary scope of action. Recommendations are formulated of how Public Service Media can advance digital democracy.

### **Grundlagenanalyse für Maßnahmen zur Herstellung von Wettbewerbsneutralität hinsichtlich der Werbeabgabe bei Onlinewerbung (Foundational Analysis of Measures for Creating Competition Neutrality in Taxing Online Advertising)**

Project team: Dr Josef Baum (University of Vienna), Prof Christian Fuchs (University of Westminster), Prof Clemens Thiele (University of Salzburg)

Funded by Österreichischer Rundfunk (ORF) [*Austrian Broadcasting Corporation*] & Arbeiterkammer Wien

Funding sum: €38,000

Duration: 2017

*Project description:*

The task of this project is to analyse foundations of how to tax online advertising. Google and Facebook dominate the online advertising market. Such transnational companies use international financial structures for avoiding paying taxes. Whereas the digital economy and the Internet are global in nature, political regulation takes place to a much larger degree on a national level. The question that the project addresses is what measures can be taken for taxing the advertising profits of such companies.

### **netCommons – Network Infrastructure as Commons**

Total funding: 1 933 500 €, funding share: 356 250 €

Duration: January 2016 – December 2018 (36 months)

Project co-ordinator: University of Trento, Italy

Funded by the EU Horizon 2020 ICT Programme

Grant agreement number: 688768

<http://netcommons.eu/>

Project description:

Communications and information distribution are key components of a modern society, and their control is the key to societal development. The advent of the Internet has been often invoked as a remedy for their democratization and the diffusion of fundamental human rights. The light of truth shows today a different picture: the digital divide is widening the gap between those who can access and take advantage of the new systems, and those who remain “disconnected” (with respect to physical access to technology, economic advantages, cultural uses and skills, and democratic impacts). A problem is emerging about the Internet’s sustainability, both socio-economic (large Internet corporations eluding taxes and aggressively commercializing most services) and political-democratic (the global Internet surveillance and the lack of transparency).

This, coupled with the complexity of the Internet’s organisation and the diffused lack of awareness about its actual implementation makes the users easy targets of manipulation, and unaware of the possibility to have a bottom-up, democratic, communal organisation of “the Internet”.

netCommons aspires to study, support and further promote an emerging trend, community-based networking and communication services that can offer a complement, or even a sustainable alternative, to the global Internet’s current dominant model. Community networks not only provide citizens with access to a neutral, bottom-up network infrastructure, which naturally increases the transparency of data flow, but they also represent an archetype of networked collective cooperation and action, mixing common or communal ownership and management of an infrastructure with a balanced set of services supported by the local stakeholders. Community networks, however, are complex systems that require multiple skills to thrive: technical, legal, socio-economic, and political.

They face many challenges and they also need abstractions, models and practical tools to grow and produce a higher beneficial impact on our society.

netCommons follows a dual approach to achieve the maximum possible impact.

On the one hand, the project works at the local level, mingling with the communities that implement and manage community networks to gather relevant information, elaborate it, and then return to communities advanced conceptual and technical tools helping them to grow and thrive. On the other hand, starting from such hands-on experience and work,

netCommons contributes to Internet Science by abstracting concepts and opening the perspective to the world of global communications. It studies solutions and interpretations of how to build global awareness about the importance of sustainability, participation, co-operation, on-line information, freedom, democracy, peer production, the public and common good, and the role of community networks to help such process. Consequently netCommons will foster the implementation of the proper actions (local to communities and global to the regulatory level) that can guarantee that information creation and diffusion remains free, neutral, fair, and respectful of individual rights.

***PACT – Public Perception of Security and Privacy: Assessing Knowledge, Collecting Evidence, Translating Research into Action***

Total funding: 2 675 107.85 €; funding share: 216 120 €

Duration: February 2012-January 2015 (36 months)

Project co-ordinator: Centre for Science, Society & Citizenship, Italy  
Consortium: 11 European teams, including the University of Westminster's  
Communication and Media Research Institute and Uppsala University's Department  
of Informatics

Funded by the EU FP7 Security Programme

Grant agreement number 285635

Project Description

PACT is a 36 month collaborative project, which aims:

- 1) to assess existing knowledge about public perception of the tension between security and privacy and the role played by social trust and concern;
- 2) to collect empirical evidence about the way in which European citizens perceive and assess in real life novel surveillance technologies;
- 3) to analyze the main factors that affect public assessment of the security and privacy implications of given security technology.

### ***RESPECT - Rules, Expectations & Security through Privacy Enhanced Convenient Technologies***

Total funding: 3 492 690.45 €; funding share: 141 600 €

Duration: February 2012-January 2015 (36 months)

Project co-ordinator: University of Groningen, The Netherlands

Consortium: 19 research teams, including the University of Westminster's  
Communication and Media Research Institute and Uppsala University's Department  
of Informatics and Media

Funded by EU FP7 Security Programme

Grant agreement number 285582

Project Description

RESPECT is a 36 month collaborative project. It seeks to investigate if the current and foreseeable implementation of ICTs in surveillance is indeed "in balance" and, where a lack of balance may exist or is perceived by citizens not to exist, the project explores options for redressing the balance through a combination of Privacy-Enhancing Technologies and operational approaches. Investigating at least five key sectors not yet tackled by other recent projects researching surveillance (CCTV, database mining and interconnection, social media, RFID & geo-location/sensor devices, financial tracking), RESPECT also carries out quantitative and qualitative research on citizens' awareness and attitudes to surveillance.

### ***Social Networking Sites in the Surveillance Society (Social Networking Seiten in der Überwachungsgesellschaft)***

€ 273 187.23

Duration: 2010-2014 (30 months)

Project co-ordinator: Christian Fuchs

Funded by Fonds zur Förderung der wissenschaftlichen Forschung/Austrian Science  
Fund (FWF)

Project number P22445-G17

<http://www.sns3.uti.at>

Project Description:

Social networking sites (SNS) are Internet-based platforms that allow users to construct profiles, establish displayed connections with other users, and that support various forms of online communication. Examples are studiVZ, MySpace, or Facebook.

The overall aim of this research project is to study electronic surveillance on social networking sites that are used by Austrian students.

The specific research questions are:

(1) How important are the topics data surveillance and privacy in discussions by SNS users? Which arguments do they use for arguing that they disagree or agree with surveillance on SNS?

(2) Which major advantages and disadvantages of social networking platforms do Austrian students see? What is the role of surveillance and privacy in this context?

(3) Are knowledge and attitude towards surveillance and privacy of Austrian students and their information behaviour on social networking platforms connected?

The research methods employed are qualitative interviewing (for research question 1) and quantitative and qualitative surveys (for research questions 2 and 3).

Theoretical foundations of surveillance and privacy will be systematically elaborated.

Interviews with students about their opinions on surveillance, privacy, and surveillance and privacy on SNS will be conducted. A survey that is focusing on students from 18 major Austrian universities as potential respondents will be carried out. We will analyze which major advantages and disadvantages students see in SNS. We will also analyze which role surveillance and privacy play in the context of the advantages and disadvantages that students perceive, how large their knowledge of surveillance is in general (surveillance knowledge index), which attitudes they have towards surveillance (surveillance critique index) and privacy, how much knowledge they have about concrete SNS that are used in Austria, and their information behaviour (advertising settings, privacy settings, etc) about specific SNS. These variables will be correlated in order to find out if and how the surveillance and privacy variables and SNS usage are causally connected.

It will be discussed how perceived surveillance risks can be reduced.

This project is an Austrian contribution to the COST Action IS0807 "Living in Surveillance Societies".

**Conference Funding by Vetenskapsrådet – The Swedish Research Council for the organisation of the Conference "Critique, Democracy and Philosophy in 21st Century Information Society. Towards Critical Theories of Social Media".** Uppsala University. May 2nd-4th, 2012. Amount of funding: 80 000 SEK.

**Vice chair and management committee member** of the EU COST Action "Dynamics of Virtual Work" (IS1202),

<http://dynamicsofvirtualwork.com/>

Member of working group 3 "Innovation and the emergence of new forms of value creation and new economic activities" (working group leader: Dr. Eran Fisher, The Open University, Israel)

Funded by COST – European Cooperation in Science and Technology

Duration: 2012-2016

Project chair: Prof. Ursula Huws, University of Hertfordshire, United Kingdom

Project Description:

ICTs have had a major impact on the content and location of work. Digitisation of information has transformed labour processes whilst telecommunications have enabled jobs to be relocated globally. But ICTs have also enabled the creation of entirely new types of 'digital' or 'virtual' labour, both paid and unpaid, shifting the borderline between 'play' and 'work' and creating new types of unpaid labour connected with consumption and co-creation of services. This affects private life as

well as transforming the nature of work. Because of the gender division of labour, this affects women and men differently.

The changing geography of virtual work and the emergence of new value-generating virtual activities have major implications for economic development, skills and innovation policies. However these are poorly understood because they have been studied in a highly fragmentary way by isolated researchers.

This COST action distills knowledge to enable policymakers to separate facts from hype and develop effective strategies to generate new employment and economic development in Europe. It will bring together experts in the fields of communications, innovation, management, digital media, creative industries, technology, employment, economics, sociology, geography, gender studies and cultural studies to consolidate theory, map this emerging field, support early stage researchers and develop new research agendas.

### **Management committee member of the EU COST Action “Living in Surveillance Societies (LiSS)” (IS0807)**

Member of LiSS working group 2 “Surveillance Technologies in Practice” (working group leader: Dr. Kees Boersma, Vrije Universiteit Amsterdam, The Netherlands)

Funded by COST – European Cooperation in Science and Technology

Duration: 2009-2013

Project chair: Dr. William Webster, University of Stirling, Scotland, United Kingdom

Website: <http://www.liss-cost.eu/>

Project Description:

Surveillance, the systematic and purposeful attention to the lives of individuals or groups, is an ubiquitous feature of European society with citizens routinely monitored by a range of sophisticated technologies. Increasing levels of surveillance are typically justified by the threat of terrorism, crime and disorder, and to improve public and private services.

The main objective of the Action is to increase and deepen knowledge about living and working in surveillance societies, to better understand the consequences of technologically enhanced surveillance for social questions, such as equity, cohesion and trust, and to make recommendations about its future governance and practice. Integral to this primary objective are core outcomes including the consolidation and evolution of knowledge, improved public policy and practice across Europe, and greater societal awareness of surveillance issues and technologies. The Action facilitates an interdisciplinary international network of academic surveillance experts and generates important knowledge for citizens, government, public agencies and the private sector.

### **Social Networking Sites and Surveillance**

Pilot study

Duration: August 2008-January 2009

Project Description:

The task of this project was to analyze the usage of social networking sites (StudiVZ, Facebook, MySpace, etc) by students in the context of electronic surveillance. An online survey was conducted, 674 students from Salzburg participated. The following aspects were assessed: Main perceived advantages and disadvantages of social networking sites, the knowledge and attitude towards surveillance, and the knowledge about and information behaviour on specific platforms.

Team co-ordination (together with Ursula Maier-Rabler) of the Project **“PoliPedia – Political Participation of Youths in the Age of Web 2.0”** (PoliPedia – Politische Partizipation Jugendlicher im Zeitalter des Web 2.0), December 2007-December 2008, funded by Bundesministerium für Unterricht, Kunst und Kultur  
€ 20 000

Project Partner:

Demokratiezentrum Wien

Project Objectives:

The context of this project is that in Austria the voting age has been lowered from 18 to 16 years, which has implications for political education. The aim of this project is to explore how Web 2.0 technologies (such as wikis, blogs, social networking, etc) can be used as tools for political education by young Austrians. The approach taken is a participatory democracy approach: the applications and the content produced are co-developed by the research team in close co-operation with young Austrians so that they can participate in the design process. The project brings together approaches from computer science, political education, and democratic theory, and hence is transdisciplinary in character. The ICT&S Center is a co-operation partner in this project that is overall supervised by Demokratiezentrum Wien.

Co-ordination (together with Ursula Maier-Rabler) of the Project **“Living Labs Salzburg: A Study on Mobile Communication in Salzburg”**, May-November 2006, funded by ZIS – Zentrum für Innovation und Standortpolitik; Land Salzburg, Fachabteilung 15: Wirtschaft, Tourismus, Energie; Land Salzburg, Fachabteilung 0/92: Hochschulen, Wissenschaft und Zukunftsfragen; Stadt Salzburg WirtschaftsService

€ 10 000

Project Partner:

Interlace Invent, Copenhagen

Project Objectives:

The objective of this project was to conduct a benchmark study that assesses the readiness of the city and region of Salzburg for the development of new projects in the area of mobile technologies and services and for becoming a member of the European-wide Living Labs network. Living Labs are innovative regions that develop new technologies and services, they form a European network of innovative regions (Living Labs Europe) in which synergies emerge from co-operation.

Research Assistant in the Project **“Human Strategies in Complexity. Philosophical Foundations for a Theory of Evolutionary Systems”**, 2001-2004, funded by INTAS (International Association for the Promotion of Co-operation with Scientists from the New Independent States (NIS) of the Former Soviet Union) and the Austrian Ministry of Education, Science, and Culture.

Project Partners:

Department of Philosophy, University of Kassel (Germany);

Chair of Philosophy and Methodology of Science, Kiev National Shevchenko University (Ukraine);

Institute of Philosophy of the Russian Academy of Science, Moscow (Russia)

Project Objectives:

- To contribute to a single and comprehensive transdisciplinary scientific research programme for investigating self-organization by elaborating selected

epistemological, ontological and axiological implications, thus attempting at unifying the scattered approaches in the so-called non-linear science of complexity

- To contribute to a scientific understanding of the "feedback-loop" of human action and reflection in a historical moment in which the destiny of the world system is at stake
